

Product Description

3M™ FASARA™ Glass Finishes are decorative glass and window films available in more than 100 designs. These decorative films can be used in vertical applications in commercial buildings to control both light and privacy through a building's interior glass, including the interior of an outside glass wall (the "Interior Applications").

3M™ FASARA™ Glass Finishes Mat Crystal 2, 3M™ FASARA™ Glass Finishes Milky Crystal, 3M™ FASARA™ Glass Finishes Frost Matte, 3M™ FASARA™ Glass Finishes Frost Sucre and 3M™ FASARA™ Glass Finishes Illumina Alpha are the only products designed for use on exterior glass.

Product Line

3M™ FASARA™ Glass Finishes, more than 100 different designs, two designs for outdoor decoration only. For available colors and patterns see the appendix or refer to www.3Mgraphics.com. Please contact the 3M Sales Office for stock available and lead times.

Expected Performance Life is 5 to 20 years for indoor, vertical applications on non-perimeter glass, depending on the design.

Characteristics

These are typical values for unprocessed product. Processing may change the values.

Physical Characteristics

Characteristic		Value
Material	Film	Polyester*
	Adhesive	Acrylic, pressure-sensitive, permanent, clear
	Release Liner	Silicone coated polyester
Thickness	Film + Adhesive	Designs vary in thickness 74 µm – 153 µm (0.074 mm – 0.153 mm)
	Release Liner	25 µm (0.025 mm)
Maximum Roll Size	Standard	127 cm x 30 m
	Mist W/S/PR, Pop W, Oval, Sand, Cloud, Illumina PR, Matte, Crystal-i, Milky White, Milky Milky, Oslo, Fine Crystal, Frost Walnut, Frost Walnut Smoke, Pyrgos	152.4 cm x 30 m
	Milky White	152.4 cm x 60 m
Adhesion, Typical Indicative values 24 hours after application FTM 1 24h 23°C / 50% RH		Glass Substrate 7 N/ 25 mm
Applied Shrinkage Indicative values FTM 14		No detectable shrinkage
Flammability		Classification of the reaction to fire performance according to DIN EN 13501 is B-s1, d0
Design		See "Product Design List". Follow the link to see the: 3m-glass-finishes-sample-book-2022.pdf

*The Matte Crystal 2, Milky Crystal, Frost Matte, Frost Sucre, Hairline, and 4 Cross Hairline patterns contain polyester and polyvinyl chloride.

NOTE: Illumina Silky-W, Illumina Silky-S, Illumina Seamless-W2, Illumina Seamless-S2, and Illumina Seamless-PR are available in sheet format. Please see the 3M™ FASARA™ Glass Finishes Sheet Format Application Guidelines for sheet size and layout details.

Application Characteristics

Characteristic	Value
Application Recommendation	Surface type: Flat Substrate type: Glass only Application Temperature: 54°F – 100°F (12 – 38 °C) Application Method: Wet
Temperature Range After Application	84°F – 176°F (29°C - +80°C) -40°F to +149°F (-40°C to +65°C) Mat Crystal 2, Milky Crystal, Frost Matte, Frost Sucre, Illumina Alpha
Electronic Cutting	Not recommended, however, should you wish to electrocut this material 3M would advise: Ensure the blades are as always as sharp as possible to reduce the risk of damage to the film edge during cutting. Avoid cutting sharp corners as these can tear during the application process.
Removal	Removable with heat and/or chemicals from supported substrate within the Expected Performance Life. After removal low adhesive residue is possible.
Shatter Prevention	FASARA™ film reduces the scattering and falling of broken pieces of glass in the event of glass breakage, and it satisfies the glass scattering prevention capability (A method, B method) according to the JIS A5759 (Japan code).
UV Block	FASARA™ films block at least 99% of the UV light to reduce the discolouring (fading caused by sunlight) of furniture that is mainly caused by UV light. Performance characteristics are based on data deemed reliable.

Warranty Information

3M Basic Product Warranty

3M Graphics Products are warranted to be free of defects in materials and manufacture at the time of shipment and to meet the specifications stated in its applicable 3M Graphics Product Bulletin and as further set forth in the 3M Graphics Warranties Bulletin.

Limited Remedy

Unsuitable End Uses

This bulletin provides technical information only. Before using, the user must determine the suitability of the product for its required or intended use, and the user assumes all risk and liability whatsoever in connection therewith. As outdoor graphics age, natural weathering occurs causing a gradual reduction in gloss, slight color changes, some lifting of the graphic at the edges or around rivets, and ultimately a minor amount of cracking. These changes are not evidence of product failure and are not covered by a 3M warranty.

Limitations of liability

All questions of warranty and liability relating to this product are governed by the terms and conditions of the sale, subject, where applicable, to the prevailing law.

Maintenance, Cleaning and Removal

NOTE: FASARA™ may be cleaned beginning 30 days after installation.

Regular cleaning will help maintain the appearance of the design. Use only clean, nick-free tools and wipe gently only in one direction (do not wipe back and forth). Do not use ammonia, chlorine, or organic-based cleaning products, polishing or cleaning compounds, sponges, brushes, or electric polishing equipment.

- If there is dust and grit, wipe it off with a soft, damp cloth.
- If it is soiled, but not gritty, use water and a rubber squeegee. Carefully use a rubber squeegee for window glass in particular moving over edges.
- If there is heavier soil, use a mild liquid detergent and water solution, then clear water, and wipe gently with a cloth wipe.

FASARA™ is removable with heat and/or chemicals from supported substrate within the Expected Performance Life.

After removal low adhesive residue is possible.

LEED®v4 Credits

The products can contribute to credits under LEED®v4. Please note that each application is different.

It is the sole responsibility of the end user to evaluate and determine whether LEED®v4 credits are applicable.

Follow the link to the customer information '[LEED®v4 credits](#)'

Shelf Life, Storage and Shipping

The shelf life as defined below remains indicative and maximum data, subject to many external and non-controllable factors. It may never be interpreted as a warranty.

The shelf life is never more than 2 years from the date of manufacture on the original box. If you process the film, the shelf life is changed to 1 year from the processing date, but not later than the 2-year maximum from the manufacturing date.

Storage conditions: +4°C to +40°C, out of sunlight, original container in a clean and dry area.

Health and Safety

When handling any chemical products, read the manufacturer's container labels and the Safety Data Sheets (SDS) for important health, safety, and environmental information.

Follow the link to obtain SDS sheets for 3M products on 3M.com/SDS.

IMPORTANT! When using any equipment, always follow the manufacturer's instructions for safe operation.

Optical Performance Characteristics and Warranty of all Product Designs

Table A. Optical Performance Characteristics for All Product Designs. The optical values in this table are calculated as theoretical values and compiled with existing data. In patterned Product designs, the value is an average across the pattern. The values in this table are typical and are based on test data deemed reliable, but they are not warranted.
